Memorandum

Flex your power! Be energy efficient!

To:

JOHN F. BARNA, Jr.

Executive Director

California Transportation Commission

Date:

March 30, 2007

From:

WILL KEMPICAL KAMPATAN Director Department Department of Transportation

Subject: 2006 Interregional Transportation Improvement Program

Attached is a copy of the California Department of Transportation's proposed 2006 Interregional Transportation Improvement Program (ITIP) Augmentation. This ITIP was prepared in accordance with Government Code 14526 and is consistent with the 2006 State Transportation Improvement Program Augmentation Fund Estimate.

Any questions regarding this document may be directed to Rachel Falsetti, Acting Chief, Division of Transportation Programming, of my staff, at (916) 654-4013.

2006 Interregional Transportation Improvement Program Augmentation Executive Summary

The Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006, approved by voters as Proposition 1B on the November 2006 ballot, authorized \$2 billion in general obligation bond proceeds to be available for projects in the State Transportation Improvement Program (STIP), to augment funds otherwise from other sources. The STIP consists of two broad programs: the regional program funded from 75 percent of new STIP funding and the Interregional Transportation Improvement Program (ITIP). The 25 percent interregional share is nominated by the California Department of Transportation (Department) in the ITIP for projects that improve transportation between regions.

This ITIP is consistent with the 2006 STIP Fund Estimate Augmentation programming targets and the California Transportation Commission (CTC) STIP Guidelines and policies and procedures specific to the 2006 STIP Augmentation. The ITIP has also been analyzed and found to be consistent with Section 164 of the Streets and Highway Code. The ITIP proposes to:

- 1. Keep projects on track for delivery by funding cost increases.
- 2. Advance the programmed delivery year for projects that are planned for delivery earlier than the 2006 STIP programmed year.
- 3. Assist in the full funding of projects programmed in the Corridor Mobility Improvement Account (CMIA) program.
- 4. Fund new projects for construction.

This ITIP proposal also supports previous CTC funding decisions for the CMIA program and for the Route 99 Bond program by recommending STIP Augmentation Bond programming towards ten CMIA projects and to two Route 99 Bond projects to fully fund these projects. In total, this program of ITIP funds represents a total committed construction value of about \$3.2 billion when considering all funding sources.

Background

The Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006, approved by voters as Proposition 1B on the November 2006 ballot, authorized \$2 billion in general obligation bond proceeds to be available for projects in the STIP, to augment funds otherwise available for the STIP from other sources. The STIP consists of two broad programs: the regional program funded from 75 percent of new STIP funding and the ITIP. The 25 percent interregional share is nominated by the Department in the ITIP for projects that improve transportation between regions.

Overview

Unlike past STIP cycles, this augmentation presented a unique opportunity to meet funding needs in the early years of the STIP cycle. In a normal STIP cycle, new funding is associated with the new fiscal years added to end of the program. Normally, new projects are added into the later years of the STIP. For example, in the upcoming 2008 STIP cycle, the new funds will be associated with the 2011/12 and 2012/13 fiscal years. The ITIP proposes to:

- 1. Keep projects on track for delivery by funding cost increases.
- 2. Advance the programmed delivery year for projects that are planned for delivery earlier than the 2006 STIP programmed year.
- 3. Assist in the full funding of projects programmed in the CMIA program.
- 4. Fund new projects for construction.

A full list of ITIP projects, including a short description of each, is included in **Appendix A**.

Since the augmentation cycle did not include any capacity for Transportation Enhancement (TE) projects, this ITIP does not propose any changes to this program.

Discussion of Programming Targets

The 2006 Augmentation Fund Estimate adopted by the CTC on December 13, 2006, set programming targets for counties and the ITIP. In each case, the fund estimate set a highway target, primarily funded through new bond revenues, and a Public Transit Account (PTA) target, funded with unused PTA funds from the 2006 STIP cycle.

By statute, prior to dividing the bond funds by formula, the CTC is obliged to make whole any actual un-programmed balances from prior STIP cycles. For the augmentation cycle, this amounts to a statewide total of about \$650 million. This is a legacy of past budgetary cycles where actual cash funds to the STIP were not realized, yet the programming commitments remained. The net result is that about \$1.35 billion of the \$2.0 billion bond proceeds were divided by formula (25 percent ITIP / 75 percent regional shares) into programming targets. After adjusting for an un-programmed balance credit to the ITIP, the fair share programming target for the ITIP is calculated at \$383 million. This is the highway target.

In addition to bond revenues, the fund estimate included a separate target for PTA funds. In general, PTA funds can be used to fund transit-oriented work. For the ITIP this means intercity rail and rail grade separations, with a few mass transportation projects. When considering the highway target and the PTA target in combination, the total programming target to the ITIP is about \$540 million.

Proposed Program

Consistent with CTC direction, the ITIP augmentation proposal is organized into priorities. **Appendix B** is a summary of new programming by priority groups.

Constrained Highway Program Priority Listing

The first section is the constrained highway program valued at about \$383 million. This represents the Department's priority for funding of projects or project components. In general, the funding capacity within this section will be used to:

- 1. Keep projects on track for delivery by funding cost increases.
- 2. Advance the programmed delivery year for projects that are planned for delivery earlier than the 2006 STIP programmed year.
- 3. Assist in the full funding of projects programmed in the CMIA program.
- 4. Fund new projects for construction.

This group represents the Department's highest priority for new STIP programming. A detailed list of projects funded within the constrained highway program is included in **Appendix C.**

Public Transit Account Eligible Program

The Department also proposes about \$78 million of PTA eligible work. This includes eleven new intercity rail projects and an increase to the Glendale Grade Separation project. This group represents the Department's highest priority for new STIP PTA eligible programming. A detailed list of projects in this group is included in **Appendix D.**

Additional Highway Program Priorities

In addition, should additional highway capacity be found available, the Department is requesting the programming of an additional set of projects. These projects are listed on **Appendix E**. In general, Appendix E funds subsequent project components for projects that are already in the ITIP. These are projects that will be competing for construction funding in future STIP cycles. Funding the subsequent project components is important to keeping delivery on schedule.

Willits Bypass

The Department has identified a construction option that requires about \$72 million beyond current programmed commitments to fully fund the Willits Bypass project. Though the CTC did not select the project for funding in the CMIA program, the Department views the project as an important priority that deserves attention. The option

now under consideration includes a staged plan that will construct a reduced scope bypass as compared to the original CMIA proposal. Though the details are still to be worked through, it is expected that the funding gap will be met with a mix of new ITIP and Regional Transportation Improvement Program funding.

Transportation Enhancements

The Department maintains its commitment to the existing pool of ITIP funded TE projects. The Department is not proposing any change to the ITIP TE project for this augmentation cycle.

Proposed for Deletion

One existing programmed project is proposed for deletion. It is the La Conchita and Mussel Shoals pedestrian crossing project located in Ventura County. Programmed in 1998 for environmental studies, the project was to address a way for pedestrians to cross to the other side of Route 101, currently a four-lane expressway. The recent decision by the CTC to program CMIA funds to widen and upgrade to freeway status the segment of roadway between Ventura and Santa Barbara completely encompasses the scope of this project. It is anticipated that pedestrian crossing needs will be addressed within this much larger project and may be addressed by the construction of an interchange for La Conchita. Since the ITIP is funding pre-construction for the larger CMIA project, the Department recommends deleting the existing ITIP pedestrian crossing project so any unexpended resources may be used toward the larger High Occupancy Vehicle (HOV) project.

La Conchita and Mussel Shoa	ls Pedestrian Crossin	ng (PPNO 2303)
(\$'	s x 1000)	
	PAED	PSE
Programmed	1,500	1,800
Expended	1,495	232

Plans for the 2008 STIP

Unlike this augmentation, the 2008 STIP programming exercise will be largely constrained to funding work in the two new fiscal years added, specifically the 2011/12 and 2012/13 fiscal years. Priorities for these funds will be to:

- 1. Maintain delivery of the existing program, including justifiable cost overruns for currently ITIP programmed project components.
- 2. Construction funding for programmed high priority, high value interregional ITIP projects that are deliverable in the 2008 STIP period.

ITIP Project Benefits

The major quantifiable benefits of ITIP projects on the State highways are described here. Intercity passenger rail projects and other non-highway projects have additional statewide and regional benefits not captured below.

ic Benefits 2006 ITIP:	
Total Number of Jobs	193,000
Construction Sector	70,000
Service Sector	52,000
Retail & Wholesale Trade	20,000
Manufacturing	19,000
Other sectors	32,000
Labor Income (\$ million)	\$7,289
Gross State Product (\$ million)	\$11,490

STIP Performance Measures

The Department's assessment of the 2006 ITIP Augmentation is consistent with CTC Guidelines, Section 19, Criteria for Measuring Performance and Cost-Effectiveness. The assessment is based on the goals and objectives for improving interregional mobility of people and goods, consistent with the Department's Interregional Transportation Strategic Plan (ITSP). The STIP Guidelines (Section 34 – Interregional Program Objectives) requires the Department to develop the ITSP to guide the investment of the ITIP funds.

The attached assessment (**Appendix F**) describes the framework of the ITSP and illustrates how the ITSP works to achieve the ITIP objectives. The ITSP presents a vision statement with a set of strategies to obtain the vision. It employs a set of guiding principles that provides a foundation for project selection criteria. The assessment includes a project matrix that illustrates how each new ITIP project supports the framework.

The Department conducted a qualitative assessment of the ITIP augmentation based on the evaluation of progress toward meeting the ITIP objectives. While some quantitative information is available, it is not currently consistent across all data elements and would not be as meaningful at this time. Improvement of the focus routes to a higher standard is a critical objective and once complete, the performance can be measured. A map highlighting the focus routes is included as the last page of Appendix F. In future STIP cycles, as data collection systems are improved, the Department will expand the assessment to quantitative analysis for all objectives.

North

Central Coast

Includes Monterey, Santa Cruz, San Benito Counties:

0032G MON 1 Salinas Road Interchange - Construct new interchange and widen to four lane freeway

Improve safety and operation of Route 1 critical for goods movement and recreational travel as well as regional commuters.

0058E MON 101 San Juan Road Interchange

Replace an at-grade crossing with a full interchange to increase safety, improve operations and facility goods movement and recreational travel.

0058G MON 101 Prunedale Improvement In and Near Salinas

Construct interchanges and operational improvements in and near Salinas Route 101 from north of Boronda Road to south of San Juan Road.

0318 MON 101 Airport Boulevard Overcrossing - Reconstruct interchange and access ramps

Reconstruct the Airport Blvd. interchange to improve connection, enhance, safety, provide connection to the Salinas Airport, and facilitate the movement of local traffic and goods movement.

0057C MON 156 Route 156 West Corridor - Widen to four lane divided expressway Add capacity to improve interregional goods and people movement on a vital east-west route linking the Central Valley with the Central Coast.

0297 SBT 156 San Juan Bautista four lane expressway

Widening on a vital east-west interregional route, connecting the Central Coast region and the San Joaquin Valley, will improve interregional movement of people and goods through the corridor.

North State

Includes Del Norte, Humboldt, Lake, Lassen, Mendocino, Modoc, Plumas, Shasta, Siskiyou, Tehama, Trinity Counties:

4421 LAK 20 Bloody Island Interpretive Center

Construct interpretive center near Clear Lake on Route 20 at the intersection with Reclamation Road.

- 0122C LAK 29 Diener Dr to North Rte 175 Upgrade to four lane expressway

 Upgrade the 7.8 mile portion of Route 29 to a four lane expressway facility as a result of a partnership involving the State and regional agencies to improve safety, reduce traffic delay and provide capacity to accommodate anticipated traffic growth.
- 3048 LAS 36 Susanville Town Hill
 Improve bicycle safety and support recreational travel to enhance the quality of life in Susanville, a significant town center for a large tourist and recreational travel.
- 0125F MEN 101 Willits Bypass Construct a four lane freeway and interchange Bypass project around the City of Willits is important partnership effort with local agencies to provide an interregional transportation facility to reduce congestion and delays, improve safety, and enhance quality of life in the community.
- 0133J MEN 101 Hopland Bypass Construct a four lane Freeway and Interchange
 Bypass project around the City of Hopland is an important partnering effort with local
 agencies to provide an interregional transportation facility to relieve congestion and
 reduce operational conflicts by separating local traffic.
- 4417 MEN 101 Mainstreet Laytonville Aesthetic Improvement
 Provide traffic calming features, creating a pedestrian friendly main street, beautifying
 main street with landscaping and bythe main street and tying in Branscomb Road as the
 main crossroad.
- 3329 SHA 5 Cottonwood Hills Truck Climbing Lane Add northbound and southbound truck climbing lanes.
- 3116 SHA 44 Liberty to I-5 aux. lane and bridge widen

 Construct an eastbound auxiliary lane to improve regional and interregional travel, improve operation and safety Redding and I-5.
- 6650 SHA 44 Redding Auxiliary Lane & Bridge Widening

 Construct a westbound auxiliary lane and bridge widening to improve operational and safety concerns on Route 44 and improve access from Dana Area of Redding to downtown Redding.
- 0137 SHA 44 Stillwater Widen to four lane freeway and interchange Provide safe and improved access to bicycle/pedestrian mobility and access to the growing area east of Redding.
- A0166A SHA 299 Buckhorn Grade Environmental Only

Improve alignment, provide passing opportunities and improve errant vehicle recovery areas on Buckhorn Grade.

3198 SIS n/a Mt. Shasta Discovery Center
Construct Interpretive/Information Center near the junction on Route 5 and Route 89.

North State (continued)

- 0320 TRI 299 Rocky Point Add east and westbound passing lanes
 Provide vehicle passing opportunities to both east and west bound directions in partnership with local agencies.
- 3104 TRI 299 Sand House Curve Construct westbound passing lane
 Provide a westbound vehicle passing opportunities to reduce operational delay in partnership with local agencies.

San Joaquin Valley

Includes Amador, Alpine, Calaveras, Kings, Fresno, Madera, Mariposa, Merced, San Joaquin, Stanislaus, Tuolumne Counties:

0304B CAL 4 Angels Camp Bypass - Construct two lane expressway

Improve both resident and recreational travel on SR4, in this foothill and mountain county and is the result of a rural partnership.

A4360B/

- B4360B KIN/TUL 198 Route 198 four lane Expressway Rte 43 to Rte 99
 Gap closure for freeway/expressway between Route 43 in Hanford and Route 99 near
 - Visalia and provide route continuity, increase capacity and improve safety.
- 1350 FRE 41 County Line Expressway Widen to four lane expressway Improve this portion of the interregional route to expressway and freeway standards.
- 1477 FRE 41 Tree Planting
 Tree planting on Route 41 at and near the Friant Road interchange.
- 1530 FRE 99 Kingsburg to Selma Convert to six lane freeway

 Continue the extension of the six-lane freeway south of the Fresno metropolitan area to
 just north of the Tulare County Line and improve goods movement corridor through the
 Central Valley.
- **MER 99** Tree Planting

 Tree planting near Delhi along Route 99 from north of Collier Road to the Stanislaus County line.
- **0528Y MER 99** Mission Avenue Interchange Landscaping

 Landscaping for parent project near Livingston along Route 99 from the Owens Creek

 Bridge to south of Childs Avenue.
- **0546Y MER 99** Livingston Stage II Landscaping

 Landscaping for parent project along Route 99 from Arena Way to north of Dwight Way.
- 5479 MER 99 Atwater Freeway Convert to six lane freeway and interchange Major interregional freeway gap closure on SR 99 and critical to north-south goods movement in the Central Valley.
- 0528D MER 99 Mission Ave Interchange/Freeway Convert to six lane freeway and interchange

Full conversion to 6-lane freeway, plus interchanges will alleviate operation and capacity issues, improve safety, and enhance goods movement on within the Central Valley.

5414 MER 99 Arboleda Road Freeway - Convert to six lane freeway and interchange

Major step in the completion of a full freeway on the SR 99 corridor and vital to improved goods movement within the Central Valley.

San Joaquin Valley (continued)

- 5401 MER 99 Freeway Upgrade & Plainsburg Road Interchange
 Critical gap-closure is a major step in the conversion of SR 99 to a full freeway
 providing needed capacity for movement of goods on a major north-south
 corridor.
- 5707 MER 152 Los Banos Bypass Construct four lane
 Gap closure bypass between two extended sections of expressway to eliminate bottleneck on SR-152 for 80 miles, enhance interregional and goods movement through Los Banos and reduce accidents and operational conflicts by separating through and local traffic.
- 7668 SJ 99 Route 99 Widening in South Stockton
 Add capacity, reduce current traffic congestion, improve operations, increase safety and accommodate future travel demand.
- **O001** SJ 205 Tree Planting
 Tree planting near Tracy on route 205 from Alameda County line to Route 5.
- 7861 SJ 205 205/580 Ultimate Truck Bypass

 Critical route connection for interregional and recreational travel and is the top priority link for commerce and freight movement between the Central Valley and Bay Area regions.
- 0003 STA 99 Tree Planting
 Provide long-range strategy for improving the aesthetics of the 99 corridor within the
 County of Stanislaus and enhancement for residents, businesses and travelers.
- 0941 STA 120 Oakdale Expressway/Bypass Construct two lane expressway on new alignment

 Rural partnership between the State and local agencies to improve travel for both regional residents and for recreational travel into the foothills and Yosemite.
- 0021B TUO 108 E. Sonora Bypass Stage II Construct a two lane expressway Improve the east-west interregional movement of people and goods and reflect a partnership effort between the State and local agencies.
- **TUO 108 Route 108 Bicycle Facility**Will close the gap in various locations, by providing continuous bike/pedestrian facilities along existing Highway 108, in Tuolumne County near the City of Sonora.

San Francisco Bay Area

Includes Alameda, Contra Costa, Napa, Marin, San Francisco, San Mateo, Santa Clara, Solano, Sonoma Counties:

0057A ALA 24 Route 24/Caldecott Tunnel CorridorConstruct fourth bore twolane tunnel

Reduce congestion, increase capacity, improve safety and enhance reliability.

0090C ALA 92 Hesperian/Santa Clara Retrofit Soundwall

Mitigate the noise impact of the roadway project.

0177/

A0157D ALA 680 Sunol Grade HOV Corridor

Add northbound and southbound HOV lanes on Route 680 over Sunol Grade, Milpitas to Route 84, ramp metering from Jacklin Road to Stoneridge Drive, and auxiliary lanes at various locations in Santa Clara and Alameda Counties.

0192E CC 4 Rte 4- Widen to eight lanes, Loveridge Road Interchange

Reconstruct interchange to add HOV and mixed flow traffic lanes along Route 4 and preserve the median space for a future mass transit system to reduce congestion.

A0360F/

B0360F MRN/SON 101 Route 101 Novato Narrows Freeway Upgrade - PAED Only

Upgrade the Novato Narrows (Sonoma & Marin Counties) segment to 6-lane freeway to increase capacity, reduce congestion, improve air quality, improve safety by eliminating at-grade crossings.

1069 MRN 1 Wildlife Crossing

Construct wildlife crossing near Point Reyes on Route 1 at Giacomini Gulch.

0342L MRN 101 Route 101 HOV Lane-Segments 2, 3, and 4 - Construct HOV lane

Reduce congestion will provide a continuous HOV facility, improving conditions on a highway corridor critical to commuting, goods movement and recreational traffic.

0343D MRN 101 Route 101 Vegetation Management Phase II

In Marin County on Route 101 from Golden Gate Bridge anchorage to Rodeo Avenue Caltrans will partner with the National Park Service to return roadside vegetation to native coastal scrub habitat.

0367D NAP 12 Jameson Canyon - Widen to four lane expressway

Reduce traffic congestion, improve safety and increase capacity on Route 12 between Route 29 in Napa County and Interstate 80 in Solano County.

0468F SCL 101 Route 101 Landscaping

Provide the necessary highway planting to mitigate the visual impact of the roadway project.

1062 SCL 152 Runoff Pollution Control

Create two disposal sites with drainage. This will result in protected storage of soil generated during storm events and eliminate current storage practices that erode and deposit sediments into Bodfish Creek.

San Francisco Bay Area (continued)

0070 SCL 152/156 SR-152/SR-156 Interchange Improvements

Widening and interchange project on a vital east-west interregional route connecting the Central Coast region and the San Joaquin Valley to improve interregional movement of people and goods through the corridor.

5201F SOL 37 Route 29/37 Interchange - Highway Planting

Provide the necessary highway planting to mitigate the visual impact of the roadway project.

5306 SOL 80 Follow-up Landscaping

Follow up landscaping project for mitigation project (PPNO 8273A).

8273B SOL 80 Route 80 Widening Landscaping

Mitigate the visual impact of the roadway project.

0748I SON 01 Kashaya Pomo Cultural Landscape

On Route 1 in Sonoma County from Salmon Creek to Gualala River.

0449N SON 101 Install Watershed Awareness Signs

Install "watershed awareness" signs along US Rte 101.

Sacramento Valley

Includes Butte, Colusa, Glenn, El Dorado, Nevada, Placer, Sacramento, Sierra, Sutter, Yolo, Yuba Counties:

2262 BUT 70 Oroville Freeway Extension (Ophier Road - Stage 1) - Widen to four lanes and construct interchange

Provide a major freeway gap closure in the northern portion of the SR99/70 corridor connecting ten of the State's urbanized areas throughout its length.

2273 BUT 70 SR 70 Passing Lanes

Construct passing lanes.

A0364A BUT 70 Route 70 Expressway (Marysville Bypass) - PA&ED Only

Provide a gap closure between the existing and proposed freeway/expressway system between Sacramento and Chico, improve safety and provide an interregional facility between Oroville and Chico.

3209 ED 50 Placerville - Lawyer Dr to Bedford Ave - Operational Improvements

Improve safety and relieve traffic congestion during both peak and off-peak periods within the project area by providing a direct connection between downtown Placerville and Placerville Drive.

3209Y ED 50 Mitigation Landscaping

3263 ED 50 Route 50 Wildlife Crossing

Provide wildlife crossings along Route 50 that will address the wildlife mortality in the area as well as the safety of the traveling public.

4107 NEV 49 Combie to Grass Valley Widening (Segment 1)

Widen roadway to accommodate significant growth in a rural are near the Sacramento metropolitan region and is the result of a partnership effort between the State and local agencies.

1409 NEV 80 Donner Memorial State Park Museum

Construct museum in Nevada County on Route 80 near Donner Lake adjacent to Donner Pass Road.

0145M PLA 65 Lincoln Bypass - Construct new four lane expressway/freeway on new alignment

Bypass project around a fast-growing community in the Sacramento metropolitan region to enhance the quality of life in the community while accommodating future growth.

0146B PLA 80 I-80 Capacity/Operational Improvements Improvements Phase 1

Includes operational improvements and an eastbound auxiliary lane from the Sacramento/Placer County line Auburn Boulevard/Riverside onramp to the Douglas Boulevard northbound off-ramp. Improve mobility, relieve congestion, maintain trip reliability, and enhance safety for freeway users from near the Sacramento/Placer County line.

Sacramento Valley (continued)

0146C PLA 80 I-80 Capacity/Operational Improvements Phase 2

Includes eastbound and westbound HOV lanes, auxiliary lanes, and Traffic Operation System (TOS) Elements from Auburn Boulevard/Riverside Avenue to just east of the Route 65 interchange west of Miner's Ravine. Improve mobility, relieve congestion, maintain trip reliability, and enhance safety for freeway users from near the Sacramento/Placer County line.

5282 PLA 89 Alice Richardson Water Pollution Abatement

Will provide controlled parking, porous paving, designated pedestrian facilities and native landscaping which will abate the existing storm water and erosion problems and allow the site to be used for safely viewing the lake and surroundings.

5705 PLA 267 Tree Planting

Tree planting in Placer County on route 267 from route 28 to Northstar.

6199C SAC 50 HOV lanes & Community enhancements

Add HOV lanes in Median of Route 50 in Sacramento County, improve the midtown and downtown Sacramento street system to enhance neighborhood livability.

0289B/

0289P SUT 70 Sutter/Yuba Route 70 Corridor Project – Construct 4-lane expressway

Reduce traffic delays and congestion, improve safety, and to initially provide expressway and ultimately freeway access to the Marysville/Yuba City area.

8362A SUT 99 Sutter Rte 99 Corridor - Widen to Four Lanes with a Median

Widen to four lanes with a median.

8366 SUT 99 Environmental Only

Reflect a partnership effort between the State and local agencies to improve safety and reduce congestion.

8557 YOL 05 Tree Planting

Tree planting in Yolo County on Route 5 from Woodland to Colusa County line.

0332D YOL 50 Harbor Boulevard Project - Widen over crossing to six lanes and revise ramps

Improve safety, mobility and intermodal transfer for goods to the Sacramento Port facility.

9725B YUB 70 Sutter/Yuba Route 70 Corridor Project (Motorplex Parkway)

Upgrade local access to the expressway and to accommodate anticipated future traffic demand.

South

Central Coast

Includes San Luis Obispo, Santa Barbara, and Ventura Counties:

1847 SLO 1 Rte 1 Hardscape Enhancements

Construct hardscape and landscaping on Route 1 from the southern limits of the city of Morro Bay to the northern limits of the city of Cayucos.

1845 SLO 1 Estero Bluffs

Implement access management and corriodr enhancements on the west side of Route 1 north of the community of Cayucos at Estero Bluffs State Park.

0452 SLO 41 Cottonwood Truck Climbing Lane

Construct a truck-climbing lane to improve movement of goods on an important highway corridor between the Central Coast and the Central Valley.

0226A SLO 46 Rte 46 Corridor - PAED Only

Convert to a 4-lane expressway.

0226B SLO 46 Rte 46 Corridor improvements (Union - Segment 1)

Convert to a 4-lane expressway.

0226C SLO 46 Rte 46 Corridor improvements (Whitley - Segment 1)

Convert to a 4-lane expressway.

0226D SLO 46 Rte 46 Corridor improvements (Whitley - Segment 2)

Improve congestion, enhance safety and provide passing opportunities, reduce driver frustration, improve the facilitation of goods movement, improve recreational travel and major east/west route from the San Joaquin Valley and Interstate 5 to the Central Coast and Route 101.

A226BSLO 46 Retaining Walls (Union)

Construct retaining walls near Paso Robles on Route 46 from Airport Road to west of Geneseo Road.

4856/4856A SLO 101 SLO Operational Improvements - 7 locations

Improve interregional movement of people and goods on a major north-south interregional Focus Route traversing the length of California's coastal areas.

A4459 SLO 101 Santa Maria River Bridge Widening

Relieve congestion, reduce delay, improve linkage between State Routes 135 and 166, enhance goods movement and provide improved bicycle/pedestrian facilities.

3918 VEN 101 Ventura/SB Route 101 HOV Lanes

Construct HOV Lanes.

3552 VEN 118 Wildlife Corridor Enhancements

The placement of the new fence would increase habitat within the Corriganville Regional Park existing directly south of Caltrans right-of-way and simultaneously lead animals to the Corriganville tunnel or Rocky Peak Road over crossing for safer crossing opportunities.

Eastern Sierra

Includes Inyo and Mono Counties:

0548 INY 190 Death Valley Scenic Overlook

Construct scenic overlook on route 190 in Death Valley National Park at Father Crowley Point.

0191 INY 395 Independence - Widen to 4-lane expressway

Upgrade to a 4-lane divided highway, add capacity, and improve interregional movement of people and goods.

0191A INY 395 Independence Archaeological Pre-Mitigation

Archaeological pre-mitigation for Independence expressway.

0172 INY 395 Manzanar - Widen to 4-lane expressway

Upgrade to 4-lane divided highway, add capacity, improve safety and benefit interregional movement of people and goods.

0172A INY 395 Manzanar Archaeological Pre-Mitigation

Improve the level of service of the facility and will provide for increased design capacity to meet present and future traffic demands.

0454 INY 395 Independence Historic Lighting

To improve pedestrian lighting, improve the scenic and historical character of the community.

0241 MNO 395 Highpoint Curve Corrections - Modify road alignment

Modify the roadway alignment to improve safety and facilitate bicycle travel.

0455 MNO 395 Sonora Wildlife Crossing

Construct concrete box culverts with wildlife fencing.

San Diego

San Diego County only:

1000 SD 11 New Route 11

The future port of entry at East Otay Mesa will help reduce traffic at the existing SanYsidro and Otay Mesa ports of entry, providing an alternate entry for commercial traffic.

0260 SD 52 Construct Route from Route 125 to Cuyamaca Street

Improves the transportation network providing a connecting link between the commercial and industrial centers in the east county and the primary north-south goods movement corridors of Interstates 5, 15, and 805.

0867 SD 163 Balboa Park Historic Landscape Preservation

To restore the landscape so that it retains the essence of its historical features. This will include planting with support irrigation, fencing and lighting.

0374K SD 905 New Route 905 - Otay Mesa - Construct 6-lane freeway

Provide access to a new truck portal to ease cross-border traffic congestion and significantly improve movement of goods between Mexico and the U.S.

0990 SD n/a Caltrans Historic Building / Transportation Museum

To preserve the building of historical significance, the effort would also provide a wealth of information that would promote, explain and interpret transportation elements over the years.

San Joaquin Valley

Includes Kern, Tulare Counties:

8042 KER 14 Freeman Gulch Widening

Upgrade to four lanes of the last "gap" segment of Route 14 between Mojave and the junction with Route 395, improve safety and accessibility for rural communities and for interregional and interstate movement of people and goods on one of the State's goods movement routes.

3380A KER 46 SLO Co Line-Keck's Road Expressway - Convert to 4-lane expressway

Will reduce congestion and improve safety, particularly in relation to truck and recreational traffic. The project ties together a series of improvements in both Kern and San Luis Obispo Counties with an emphasis of improving the highway to four lanes from Route 101 to Interstate 5.

3386 KER 46 Route 46 Expressway - Segment 1

Provide a main link from the San Joaquin Valley to the Central Coast, reduce congestion and improve safety, particularly in relation to truck and recreational traffic.

3386A KER 46 Route 46 expressway, Segment 3

Convert to a 4-lane expressway west of the City of Wasco from Kecks Road to Route 33.

0258B KER 58 Rehabilitation/Relinquishment of Rte 58

Rehabilitate existing SR 58 east and west of Mojave and portions for relinquishment to Kern County.

3548 KER 99 Tree Planting

Tree planting on Route 99 from north of Olive Drive to north of Oil Junction.

8539 KER 395 Inyo Kern Four Lane - Convert to 4-lane expressway

Provide route continuity and improved interregional mobility of people and goods connecting the Eastern Sierra region and Western Nevada to the Southern California region.

6231 TUL 63 Pedestrian Facility

Construct pedestrian enhancements on Route 63 from Avenue 408 to Albert Avenue.

6400 TUL 99 Tagus Ranch - Convert to 6-lane freeway

Convert to 6-lane freeway on Route 99 south of Fresno Metropolitan Area from Prosperity Avenue to Goshen OH.

6480 TUL 99 Goshen/Kingsburg - Convert to 6-Lane freeway

Provide route continuity with the objective of widening all of Route 99 to a minimum of a six-lane freeway throughout the San Joaquin Valley to improve goods movement and accommodate future increases in traffic volumes.

See page 4 for a project in both Kings and Tulare Counties (A4360B and B4360B).

Southern California

Includes Imperial, Los Angeles, Orange, Riverside, San Bernardino Counties:

0051Y IMP 7 Landscape Mitigation

Provide the necessary highway planting to mitigate the visual impact of the roadway project.

0021 IMP 78 Brawley Bypass - Route 86 to Route 111

Construct 4-lane Expressway Construct a 4-lane expressway bypass and interchange around the City of Brawley to accommodate increased regional and international traffic due to NAFTA and provide continuity between the international border with Mexico and Riverside County.

0021F IMP 78 Brawley Bypass Stage 2

Provide the necessary highway planting to mitigate the visual impact of the roadway project.

0549 IMP 98 Route 98 Widening (West of Rte 111)

Widen conventional highway from 2-lanes to 4-lanes (Calexico from Navarro Ave to Route 111.

0151E LA 5 Ultimate HOV/Empire Interchange Improvements

Reduce congestion on I-5 to benefit interregional travel connections between I-5 and the Burbank-Glendale-Pasadena Airport.

2120 LA 5 I-5 Western Interchange Modification

Provide congestion relief for future local and regional traffic and eliminate existing deficiencies at the I-5/ Western Ave Interchange and Western Ave/Flower Street intersection.

2808A LA 5 Orange County to Rte 605 - Carmenita Interchange

Improve on and off ramps traffic movements and overall interchange traffic circulation, reduce congestion and improve safety to accommodate new I-5 freeway cross section.

2808 LA 5 I 5 Widening - Orange County Line to Route 605

Widen for HOV and Mixed flow lanes. Add capacity for future travel demands, improve access to regional transit, reduce travel time and congestion, eliminate northbound bottleneck as between the Orange County and LA County line.

3547 LA 5 Landscape Planting and Aesthetic Enhancement

To beautify a densely populated area and improve graffiti control techniques.

3548 LA 10 Landscape Planting and Aesthetic Enhancement

To beautify a densely populated area and improve graffiti control techniques.

0309S LA 10 Baldwin Park – Soundwalls

Mitigate the noise impact of the roadway project.

2119 LA 105 Sepulveda to Nash Wesbound Off Ramp Widening

Reduce congestion on the main line and speed access to the Central Terminal Area at LAX.

Southern California (continued)

- 3550 LA 110 Median, Ramp and Connector Improvements
 Will include sandblasting of the concrete median barrier to achieve uniform color.
 Pavers will be installed on the median island to improve its appearance.
- **3546** LA 110 Aesthetic Enhancement

 To beautify a densely populated area and improve graffiti control techniques.
- 3331 LA 138 Route 138 Widening Various locations, from Avenue T to Route
 18
 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 3325 LA 138 Route 138 Widening Near Palmdale, from 60th Street to east of Avenue T-8

 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 3326 LA 138 Route 138 Widening Near Littlerock, from 77th Street East to 89th Street East
 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 3327 LA 138 Route 138 Widening Near Pearblossom, from 96th Street to 106th Street East
 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 3330 LA 138 Route 138 Widening Near Pearblossom, Big Rock Wash Bridge Replacement
 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 0694Q LA 138 Route 138 Widening Near Llano, from 175th Street East to Largo Vista Road

 Will serve to relieve congestion and enhance safety along the Route 138 Corridor.
- 3328 LA 138 Route 138 Widening Near Pearblossom, from 126th St. East to Longview Road

 Improve safety, provide mobility and congestion relief on State Route 138 which connects two of the State's fast growing urbanized areas of Antelope Valley and Victorville the interchange.
- 0831 LA 405 Rte 405-Arbor Vitae South half of Interchange
 Reduce congestion, improve safety and traffic flow and access to the Los Angeles Intl
 Airport.
- 2215 LA 710 Rte 710 study per Record of Decision

 Close the Gap between I-10 in Los Angeles and Route 210 in Pasadena to complete the Freeway system in one of the busiest region in the Los Angeles County.

Southern California (continued)

3612 LA 710 I-710 Expansion

Widen freeway between the Ports in City of Long beach and Caeser Chavez Overcrossing in East Los Angeles.

2592 ORA 5 Scenic Enhancements

Provide enhanced paving and landscaping in Orange County on Route 5 from Calle Juanita to 4th Street.

4110 ORA 74 Route 5 to Antonio Parkway Widening

Improve traffic flow and accommodate future travel demands.

0048W RIV 91 Eastbound 91 to Northbound 71 Connector

Improve travel for commuters on the regional freeway system between the rapidly expanding Inland Empire and the central core areas of the metropolitan region.

0072G RIV 91 Green River Road Landscape Enhancement

Provide an aesthetic design for landscaping the Green River Road Interchange.

0116F RIV 215 Rte 60/215 East Junction HOV Connector

Construct HOV Connectors at the 60/215 East Junction.

0154D SBD 10 Tippecanoe Ave Interchange improvements

Reduce congestion at interchange, relieve impacts to the freeway, and provide capacity for future development in the areas around the San Bernardino International Airport.

0175N SBD 15 Landscape Enhancement

To improve the aesthetic design to the gateway in the City of Victorville.

0176A SBD 15 I-15 SB Truck Climbing Lane

Separate trucks and other vehicles in the hill portions of I-15 to improve goods movement between Southern California and destinations in Nevada, Utah and beyond.

0176D SBD 15 Desert Managers Group Visitor Center

Develop California Welcome Center

0174L SBD 15 Phase 2 NB Widening

Add capacity, upgrade of I-15 to current standards, eliminate operational deficiencies and enhance safety by reconstructing three interchanges in the city of Victorville.

0180F SBD 18 Rural Gateway Beautification and Modernization

Aesthetic Improvements to Rural Gateway.

0215C SBD 58 Construct 4-lane Expressway (Kramer Junction)

Add capacity and operational improvements to this significant corridor for east-west goods movement and improve safety and reliability at Routes 58/395 Junction.

0217F SBD 58 Realign and widen to 4 lane expressway (Hinkley)

Add capacity to improve goods movement on a major interregional route connecting I-40, a vital east-west Interstate to the East Coast, and I-5, California's major north-south Interstate route.

Southern California (continued)

0234P SBD 71 Tree Planting

Tree Planting (Phase 1) in San Bernardino County from Soquel Canyon Parkway to Riverside County Line and in Riverside County from San Bernardino County Line to the Santa Ana River Bridge.

0239DSBD 138 Rte 138 Widening (Portions)

Near Wrightwood from Beekley Road to Juction Route 15, widen from two to four lanes and construct two wildlife crossings; and from Phelan Road to Beekley Road, construct eastbound lane.

0194T SBD 210 Etiwanda Windbreak Rural Historic Landscape

Mitigation planting of 2,000 eucalylptus trees in Rancho Cucamonga on Route 210.

0260B SBD 395 US 395 Widening

Close a 48-mile expressway gap in the interregional road system to improve interregional mobility of people and goods.

Intercity Rail, Grade Separation and Mass Transportation (Multimodal) Projects

Importance

The multi-modal systems in California are a vital part of the total transportation system. The State's Intercity passenger rail system (Amtrak), comprised of the Surfliner, San Joaquin, and Capitol Corridor routes, carries more than 3.6 million passengers per year between urban centers and interregional destinations. The routes parallel congested Interstate and other highway routes providing alternatives to personal vehicles. The major commuter rail systems in the largest urban centers carry over 600 thousand passengers daily combined providing mobility and alternatives to congested state routes. Improved multi-modal transfer stations are critical facilities/services to encourage increased use of rail/transit. Smart growth planning by regions and local jurisdictions around rail/transit stations and lines in the urban and metropolitan areas for housing, commercial and jobs creation will ensure both a higher return on the transportation investment and improved quality of life. Comprehensive corridor planning that emphasizes a complete strategy of smart growth (creation of jobs/housing), improved multi-modal systems and connectivity, and optimization of high standard state routes (Interstates) will ensure sustained economic health, livelihood and mobility in California.

Projects:

2021 ALA Livermore Valley Siding

Extend siding by 8,000 feet for safe passing/staging area for trains traveling bi-directionally on the single track service both commuter passenger rail and commercial freight rail traffic.

2103 ALA BART Oakland Airport Connector

Provide a direct access from the BART system to the Oakland International Airport to improve reliability and convenience of travel and reduce congestion.

2020 ALA Emeryville Intermodal Transfer Station

Improve bus transfers between Amtrak intercity trains and local and feeder bus service and increase parking availability for rail patrons to increase ridership and improve reliability.

2086 ALA Emeryville Station and Track Improvements

In the city of Emeryville, in the area of the existing passenger rail station, extend siding track with associated signal and other track improvements.

2083 ALA ACE Corridor Signal Upgrade

Improve operational characteristics along the corridor from Stockton to Fremont along the ACE rail line and install modern signal devices.

2011G CC Richmond BART Parking Structure

Construct parking structure to accommodate 680 replacement parking spaces and 120 new spaces for a total of 800 spaces.

9814 LA Glendale Grade Separation (Pacific Surfliner) at SR 134

Eliminate delays, improve reliability of the both commuter and freight rail service.

2023 LA Los Angeles Storage Facilities & Track

Improve access and capacity for both intercity and commuter rail services and improve ontime performance and reliability.

Multimodal Projects (continued)

2002 LA La Mirada to DT Junction Third Track

Add third track to facilitate the integration of freight rail and passenger rail operations (Amtrak and Metrolink) in a critical rail corridor and increase interregional passenger rail service.

2002A LA LA Fullerton Triple Track and Grade Separation (Rosecrans)

Construct triple track and grade separation at Rosecrans and Marquardt Ave.

2318 LA Alameda Corridor East Grade Separations

Separate vehicular traffic on SR1 from freight rail traffic to and from the ports of Los Angeles and Long Beach.

2025 MAD Madera Amtrak Station Relocation

Relocate the Madera Intercity Rail site to a more visible, accessible, convenient and safe location and is expected to increase ridership on the San Joaquin and Amtrak routes.

2082 MER Merced Crossover

Construct a crossover between the mainline and adjacent siding near the Merced Amtrak station and other track and signal improvements.

2026 ORA Fullerton Transportation Center - parking expansion

Add parking spaces at the Fullerton Transportation Center needed to increase ridership on intercity train service between San Diego and Los Angeles and Riverside Counties.

9879 PLA Roseville Third Track

Improve running times and on-time performance of the Capital Corridor intercity passenger rail service between Sacramento and Auburn and will allow for overall expansion.

0079D RIV N. Main Corona Parking Structure

Construct 1,000 space parking structure at for commuter service to congestion along the SR 91.

2027 SAC Elk Grove Intercity Rail Station

Provide a conveniently located passenger rail station and parking for area residents, increasing the desirability of using the San Joaquin Intercity passenger service.

2087 SB Siding Upgrade and Extension

Create new sections of double track based upon modeling results, engineering feasibility and environmental constraints from Milepost to Pacific Surfliner route.

0150D SBD Colton Crossing Railroad Grade Separation

Construct railroad grade separation south of I-10.

7300 SD Del Mar Bluff Stabilization

Provide stabilization of the bluffs near Del Mar critical to maintain the mainline for goods movement, Pacific Surfliner and Coaster passenger service.

9865 SD San Dieguito River Bridge Replacement

Replace bridge and add a second track to improve reliability, improve operational flexibility, and reduce maintenance cost.

Multimodal Projects (continued)

9069A SD Sorrento to Miramar Double Track/Realign

Add capacity, improve speed and operational efficiency of the mainline tracks.

2068 SD Signal and Communication System Upgrade

Signal and communications system analysis and upgrade on Pacific Surfliner/Coaster BNSF line.

2006 SD Replace Santa Margarita Bridge and Second Track

Replace bridge with a 2 track bridge and construct additional double track.

2062 SD Solana Beach Transit Station Parking Structure

Construct new Parking Structure.

2071 SD Oceanside Double Track

Construct two 220 foot bridges at Loma Alta Creek and extend existing Oceanside siding by 1.2 miles creating a total of 2.5 miles of double track from MP 225.9 to MP 228.4.

2072 SD Encinitas Grade Separated Pedestrian Crossing

Construct a grade separated pedestrian crossing in the vicinity of Santa Fe Drive (between E Street and Chesterfield Drive) in the City of Encinitas.

2073 SD Carlsbad Double Track

Add new second main track for approximately 2.0 miles from Control Point (CP) Carl to CP Farr, through the city of Carlsbad, including a universal cross-over installed at CP Carl.

2074 SD San Luis Rey River Bridge and Second Track

Add 0.6 mile of second main track to connect passing tracks at Fallbrook Junction and Oceanside, and replace the single track bridge with a new double track bridge, in the City of Oceanside.

2008 SCL Capitol Corridor-San Jose-Santa Clara Fourth Main

Increase rail track capacity to improve on-time performance, schedule flexibility, and corridor reliability for the Capitol Corridor, ACE, and Caltrain services freight.

2030 SJ Capacity Improvements

Increase capacity of commuter rail, improve reliability and reduce running times on this vital interregional commuter rail corridor between the high growth Central Valley and the Bay Area.

2031 SJ Stockton SP Depot Restoration

Restore the historic SP Depot in Stockton for use as a multimodal center for commuters using ACE, Amtrak San Joaquin, and Greyhound Bus.

2066 S.J. Stockton ACE Northwest Track Connection

2085 SOL Bahia Benicia Crossover

On the Union Pacific right-of-way, roughly parallel to the I-680 corridor north of the Martinez bridge, construct crossover between the two mainline tracks.

Multimodal Projects (continued)

2065 VAR Capitalized Maint. (Cap Cor, Surfliner, San Joaquin)

Various maintenance projects on the Capital Corridor, Surfliner and San Joaquin intercity rail routes.

2070 VAR Southern California Regional Rail Authority (SCRRA) Sealed Corridor Project

The SCRRA Sealed Corridor project covers the entire Metrolink system, which serves the counties of Los Angeles, Orange, Riverside, San Bernardino, and northern San Diego. This project will enhance the safety of highway/rail grade crossings on the predominantly urban rail lines owned by the SCRRA.

2089 VAR Sidings in Santa Barbara and Ventura Counties

From Milepost (MP)423.0 to MP 368.6, Pacific Surfliner route, complete environmental clearance, design, engineering and permitting for siding projects in Santa Barbara and Ventura Counties.

2088 VEN Ventura County Sealed Corridor

On Metrolink's Ventura County rail line, design and construct safety improvements to rail/highway grade crossings.

Appendix F – Assessment of 2006 ITIP Augmentation

Assessment of 2006 Interregional Transportation Improvement Program Augmentation

Interregional Transportation Strategic Plan (ITSP)
State Transportation Improvement Program (STIP) Guideline 19
Criteria for Measuring Performance and Cost-Effectiveness

Introduction

The 2006 Interregional Transportation Improvement Program (ITIP) Augmentation was developed based on goals and objectives for improving interregional mobility of people and goods consistent with the Department's Interregional Transportation Strategic Plan. The ITSP guides investment of ITIP funds towards achieving the vision for the interregional transportation system and meeting six interregional system improvement objectives. STIP Guidelines (Section 34 – Interregional Program Objectives) state the objectives to which ITIP funds must be directed and requires preparation of the ITSP.

For this Augmentation, the Department is relying primarily upon a qualitative assessment of the ITIP to assess and measure performance compared to the goals and objectives in the ITSP. A qualitative assessment is appropriate based on the principal ITSP objectives to complete the interregional trunk system (referred to as Focus Routes) to higher standard (typically freeway and expressway), and to connect urbanized areas and metropolitan centers, high growth areas, and rural and smaller urban centers to the trunk system. As routes are completed to the higher standard, through continuing progress to program the ITIP towards meeting these objectives, the route performance can then be assessed quantitatively.

The ITIP Augmentation also contributes towards selected improvements in congested urban freeway corridors that improve goods movement into and through the "Gateway" and to intermodal transfer facilities. On these corridors, the Department will be moving more rapidly in future STIP cycles towards a quantitative assessment. The Department will be assessing corridor performance and continually working towards implementing corridor and system management and, with its transportation partners, to strengthen data collection systems and detection for real-time freeway performance.

Structure of Assessment Report

This initial qualitative assessment is divided into three primary sections. The sections are:

- 1. A framework stating the goals and objectives in the ITSP,
- 2. A higher level evaluation of how the ITIP contributes towards meeting them, and
- 3. A matrix both summarizing the primary linkages of projects to goals and objectives and exactly identifying the objective(s) the project addressed.

The matrix is a key element of the assessment and should be referred to for understanding linkages of projects to the ITSP goals, strategies, principles and objectives. Each interregional transportation system element is assigned a color for ready comprehensive on ITSP and ITIP linkages. The matrix cells are filled in to match the principal linkages. All cells should NOT be completed for all projects. The rows are specific to a particular element of the ITSP or objective. The six objectives to which ITIP funds are to be directed are distinct and specific to system types,

demography, and other factors. In some cases multiple cells may be filled in. This is particularly the case with completion of the trunk system (Focus Routes) that has additional linkages to three other objectives.

The assessment includes only new projects that are being added into the ITIP. This includes three (3) highway and eleven (11) intercity rail projects.

Framework for Assessment

Assessment of the ITIP Augmentation is based on both the "Vision" for the interregional transportation system and "Objectives" to which ITIP funds are to be directed to achieve it. The matrix described above identifies this relationship. The vision and objectives are described below. The ITSP additionally includes supporting "Strategies" and "Principles" to move towards meeting the vision. These are included in this assessment as vital contributors towards achieving the vision and meeting interregional mobility objectives.

I. Vision for the Interregional System and Strategies to Achieve the Vision

The ITSP (Section III. 1.) identifies a vision for each of the interregional system elements for which ITIP funds can be directed by statute. For purposes of this assessment, the vision is the goals for the interregional system. Below are the goals (the vision) for the four elements of the interregional system.

Vision

State Highways

Provide a dependable and reasonable level of service for the interregional movement of people and goods, accessibility into and through "gateways" and connectivity to intermodal transfer facilities.

Intercity Passenger Rail

Intercity passenger rail service provides a clear and attractive alternative to automobile and air travel in the major corridors linking the urban centers of California—and, via national interstate trains, to the rest of the nation. Service is frequent, direct, reliable and fast.

Grade Separations

Provide safe railroad grade crossings at state highways, and minimize disruptions and delay to interregional movement of people and goods.

Mass Transit Guideways

Provide cost-effective modal investments for the highest traveled and highest density guideway corridors that support interregional travel and have overriding statewide significance.

Strategies

The ITSP (Section III. 2.) identifies the following strategies to complement and move towards meeting the vision. These strategies are a critical component of each ITIP development and tie directly to meeting ITSP objectives.

State Highways

- 1. Focus investments on a key subset of Interregional Road System Routes (IRRS) that are major north-south and east-west routes serving the State as a whole.
- 2. Improve routes to minimum facility standards, directing priority programming to major underdeveloped routes.
- 3. Identify key gateways of major statewide significance and target improvements to, through, and within the gateway area.
- 4. Rely on and advocate investments by Regional Transportation Planning Agencies of State Highway funds under their control, to address capacity and operational needs in urbanized areas and on the non-IRRS portion of the State Highway System.
- 5. Improve non-IRRS routes using the State Highway Operation and Protection Program (SHOPP) for smaller operational improvements and facility improvements within traditional SHOPP rehabilitation and reconstruction projects.
- 6. Make optimum use of the capacity available on the existing "built" system through operational improvements and strategies.
- 7. Coordinate operational plans, improvements and strategies with regional agencies, the goods movement industry, and other modal and intermodal owners and operators (e.g. airports, seaports, freight rail, and intermodal transfer and distribution centers).
- 8. Apply and integrate new technologies into management of the "built" system, and plan and design new technologies into new construction.

Intercity Passenger Rail

- 1. Increase speeds and reduce running times on all routes, thus enhancing their efficiency and effectiveness as a transportation alternative.
- 2. Increase capacity on all three routes consistent with adequate ridership demand and feasibility.
- 3. Improve reliability and on-time performance through track, signal and station projects.
- 4. Protect the State investment in rolling stock through careful monitoring of California Car warranty provisions and oversight of maintenance.
- 5. Comply with all federal and state safety and public facility requirements, including the upgrade of facilities to comply with the Americans with Disabilities Act (ADA).

Grade Separations

- 1. Provide public education about grade crossing awareness.
- 2. Reduce the incidence of accidents at grade crossings on state highways and work with local agencies, under the aegis of the Public Utilities Commission (PUC), to reduce the incidence of accidents at grade crossings on local streets and roads.
- 3. Work with passenger and freight rail owners to cooperatively fund improvements at critical accident locations.

Mass Transit Guideways

- 1. Advocate for significant state interest in guideways serving the highest traveled and highest density travel corridors, where guideway development will support interregional mobility.
- 2. Participate with Regional Transportation Planning Agencies (RTPAs) and transit providers in corridor studies and major investment studies that examine cost-effective guideway investments to support interregional mobility.

II. Guiding Direction for Plan and Program

The ITSP identifies principles, objectives and criteria to guide investment decisions (Section V. 1., 2, and 3) that complement achieving the goals and strategies above. The principles and objectives are identified below. The criteria are not repeated here. Criteria will be refined as the performance measures efforts mature.

Principles

Eight (8) key principles guide the ITSP. These principles recognize the diversity of the State and important but varied interests between rural and highly urbanized areas.

- 1. California's transportation planning process relies on open communication and an ongoing cooperative relationship between all members of the transportation community. The Department and the RTPAs must mutually consult, cooperate, and seek consensus on transportation priorities and strategies.
- 2. The Department has primary responsibility for the interregional mobility of people and goods. Regional and local agencies have primary responsibilities for regional and local mobility and for actions to mange commute and other congestion in their areas. Larger metropolitan areas are responsible for managing interregional commute congestion within the Transportation Management Area.
- 3. Rural areas of the State contribute to the State's economic well-being and quality of life. The State has a vital interest in agriculture, mining and timber production. Recreational travel and tourism are vital to the State and regional economies, and are considered in all aspects of transportation planning.
- 4. Connecting people and goods to growing urban centers, urbanized areas and major gateways is vital to the economy and quality of life in California.
- 5. Movement of goods and services into and through urbanized areas and gateways and to intermodal facilities is a critical component of the interregional program.
- 6. The designated Interstate System is the backbone of the State's transportation system for interregional, interstate and international goods movement, access to seaports, air cargo terminals and other intermodal transfer facilities. Improvements within major gateways in urbanized areas will often involve Interstate routes.
- 7. Key segments of the State Highway System are incomplete or under-developed. These will be developed to minimum facility standards as programming priorities allow, considering a range of qualitative and quantitative planning and operations factors.
- 8. Intercity passenger rail is an important component of the state's interregional transportation system. The Department will continue to expand intercity rail service in the three key statewide corridors and add additional corridors as demand and funds dictate. The State will advocate for an appropriate continuing level of interstate passenger rail service. Additionally, over the long-term, the State will pursue the true high speed rail (HSR) development in California, when economically feasible.

Objectives

Six (6) key objectives are identified to which ITIP funds are to be directed for improved interregional mobility. These are described within the STIP Guidelines (Section 34 - Interregional Program Objectives). The guideline includes additional guidance from the California Transportation Commission (CTC) on the intent and purpose of carrying out the Program.

- 1. Complete a trunk system of higher standard (usually expressway/freeway) state highways.
- 2. Connect all urbanized areas, major metropolitan centers, and gateways to the freeway and expressway system to ensure a complete statewide system for the highest volume and most critical trip movements.
- 3. Ensure a dependable level of service for movement into and through major gateways of statewide significance and ensure connectivity to key intermodal transfer facilities, seaports, air cargo terminals, and freight distribution facilities.
- 4. Connect urbanizing centers and high growth areas to the trunk system to ensure future connectivity, mobility, and access for the State's expanding population.
- 5. Link rural and smaller urban centers to the trunk system.
- 6. Implement an intercity passenger rail program (including interregional commuter rail) that complies with federal and state laws, improves service reliability, decreases running times, and reduces the per-passenger operating subsidy.

Qualitative Evaluation of 2006 ITIP Augmentation for Meeting ITSP Goals and Objectives

The 2006 ITIP Augmentation identifies three (3) new highway and eleven (11) new intercity rail project to be added into the ITIP that meet the goals, strategies, principles and four of the six objectives in the ITSP for improving interregional mobility of people and goods. The matrix that follows identifies how each new ITIP project meets the goals, strategies, principles and objectives in the ITSP. For purposes of this evaluation, projects already adopted by the CTC in the 2006 STIP (projects with cost increases) are not included in the matrix. The same qualitative factors were used for these projects during the last 2006 ITIP cycle and the project scope remains unchanged. All projects have safety benefits. Projects otherwise contributed towards improved mobility, reliability and productivity. These are not quantified. Each objective is briefly restated with a narrative description of how the projects as a whole respond.

Objectives and ITIP Augmentation Projects

1. Complete a trunk system of higher standard (usually expressway/freeway) state highways. (Referred to as Focus Routes)

This ITIP Augmentation continues the priority of making investments to improve Focus Routes to higher standard. A map of the uncompleted Focus Routes (with the completed Interstates) is included as an attachment to this evaluation. The map also identifies the urbanized areas and year designated. This map is important to understand the criticality of completing the Focus Routes to ensure a strong ground transportation system for California. The Focus Routes, with the Interstates and limited numbers of other non-Interstate completed freeways, carry the largest volumes of travel for people and goods statewide.

Investments are made on SR-70 and U.S. 101, both Focus Routes. Completion of these routes to higher standard is the highest priority.

2. Connect all urbanized areas, major metropolitan center and gateways to the freeway and expressway system.

Completion of the Focus Routes to higher standard above will provide 24 urbanized areas with direct connection to a completed freeway for interregional and regional travel. Thirty of California's 55 urbanized areas are not on a completed freeway. This ITIP Augmentation addresses this need through both continuing investment on the Focus Routes and making progress towards connecting the urbanized area.

SR-70 is an integral part of the SR 99/70 corridor that provides vital linkage between the urbanized areas of Sacramento, Marysville/Yuba City and Chico. This corridor is beginning to experience travel delay due to growth in Butte and Yuba/Sutter Counties and the Sacramento region. The passing lane project has immediate, independent utility and benefit while furthering the ultimate goal of completing a higher standard SR 99/70 facility.

Adding HOV lanes on U.S. 101 in Ventura and Santa Barbara Counties represents only one component of a larger Route 101 corridor improvement strategy. This segment serves as a key travel corridor for commute travel, commerce/goods movement and interregional travel between the San Francisco Bay Area and the Los Angeles basin.

3. Ensure a dependable level of service for movement into and through major gateways of statewide significance.

Gateways are major centers of entrance into the State from the Pacific Rim or from other States. In some instances they are major terrain/mountain gateways, such as the Grape Vine. The concept of a Gateway is described in the ITSP (Section VI.5.) and a map identifying each Gateway and major routes within it is included (page 26).

This ITIP Augmentation continues to make investments within major Gateways to improve primarily Interstates routes (such as I-5) for the efficient movement, connectivity and transfer of freight. The I-5 truck climbing lane project will improve operations and avoid traffic delay in currently mile-long upgrade of 2.5% to 2.9% at the Cottonwood Hill location. Project has additional benefits for all travelers.

4. Implement an intercity passenger rail program.

Continuing improvements to the three (3) intercity passenger rail corridors are made in the ITIP, including station improvements.

Performance Indicators and Measures

This evaluation does not provide a quantitative assessment of the ITIP using the indicators and measures in Guideline 19. A baseline for current system performance is not stated for all categories and projected impact of projects is not made for any category. All projects meet stated objectives in the Commissions Guidelines (Section 34). At a higher level the Department performed baseline calculations and performance measure evaluations for selected categories.

Safety

Project	Fatal Accidents	%	Injury Accidents	%
Butte SR-70 Passing Lanes	3	4.0	6	45.0
Shasta I-5 Truck Passing Lane	1	1.0	17	25.0
VEN-SB SR-101 HOV Lane	4	2.2	177	40.8
Total/Average	8	2.4	200	36.9

Reliability - Intercity Passenger Rail

On Time Performance: Average 70.6 % all three corridors

Productivity - Intercity Passenger Rail

Current Performance: Passenger Mile/Train Mile – 105.8

Return on Life Cycle Investment

Project	Life Cycle Cost (\$1,000)	Value	Savinge	B/C Ratio	Rate of Return (%)
Butte SR-70 Passing Lanes	\$20,000	\$90,400	\$4,700	5.5	29.1
Shasta I-5 Truck Passing Lane	\$23,100	\$34,300	\$1,100	2.5	17.2
VEN-SB SR-101 HOV Lane	\$126,300	\$24,200	\$7,500	1.2	6.7
Total/ <i>Average</i>	\$169,400	\$148,900	\$13,300	3.1	17.7

ITIP Augmentation Projects Matrix by Qualitative Plan Elements

The matrix that follows identifies how each new project meets the goals, strategies, principles and objectives in the ITSP for improving interregional mobility of people and goods. It is arrayed by major categories of state highway projects and intercity passenger rail only. There are no new mass transit guideway, and grade separation projects in this Augmentation. A separate listing (or key) to the matrix categories is attached for ease of comparison.

Principles

- 1. California's transportation planning process relies on open communication and an ongoing cooperative relationship between all members of the transportation community. Caltrans and the RTPAs must mutually consult, cooperate, and seek consensus on transportation priorities and strategies.
- 2. Caltrans has primary responsibility for the interregional mobility of people and goods. Regional and local agencies have primary responsibilities for regional and local mobility and for actions to manage commute and other congestion in their areas. Larger metropolitan areas are responsible for managing interregional commute congestion within the Transportation Management Area.
- 3. The rural areas of the state contribute to the state's economic well-being and quality of life. The state has a vital interest in agriculture, mining, and timber production. Recreational travel and tourism are vital to the state and regional economies, and are considered in all aspects of transportation planning.
- 4. Connecting people and goods to growing urban centers, urbanized areas, and major gateways is vital to the economy and quality of life in California.
- 5. Movement of goods and services into and through urbanized areas and gateways and to intermodal facilities is a critical component of the interregional program.
- 6. The designated interstate system is the backbone of the state's transportation system for interregional, interstate, and international goods movement, access to seaports, air cargo terminals, and other intermodal transfer facilities. Improvements within major gateways in urbanized areas will often involve interstate routes.
- 7. Key segments of the state highway system are incomplete or under-developed. These will be developed to minimum facility standards as programming priorities allow, considering a range of qualitative and quantitative planning and operations factors.
- 8. Intercity passenger rail is an important component of the state's interregional transportation system. Caltrans will continue to expand intercity rail service in the three key statewide corridors and add additional corridors as demand and funds dictate. The state will advocate for an appropriate continuing level of interstate passenger rail service. Additionally, over the long-term, the state will pursue true high speed rail (HSR) development in California, when economically feasible.

Objectives

- 1. Complete a trunk system of higher standard (usually expressway/freeway) state highways.
- 2. Connect all urbanized areas, major metropolitan centers, and gateways to the freeway and expressway system to ensure a complete statewide system for the highest volume and most critical trip movements.
- 3. Ensure a dependable level of service for movement into and through major gateways of statewide significance and ensure connectivity to key intermodal transfer facilities, seaports, air cargo terminals, and freight distribution facilities.
- 4. Connect urbanizing centers and high growth areas to the trunk system to ensure future connectivity, mobility, and access for the state's expanding population.
- Link rural and smaller urban centers to the trunk system.
- Implement an intercity passenger rail program (including interregional commuter rail) that complies with federal and state laws, improves service reliability, decreases running times, and reduces the per-passenger operating subsidy.
- 7. Compatible with ITSP, Not in plan

Designation Trends of Urbanized Areas on Transportation Paths

Appendix G - ITIP Funding Formulas

The 25% interregional program is not constrained by county shares. However, by law, new funding to the program must comply with the following constraints:

Part 1 - 60% of the program shall be programmed for improvements to State highways that are specified in statute as part of the interregional road system (IRRS) and are outside urbanized areas, and for intercity rail improvements.

Of this amount, at least 15% (9% of the interregional program) shall be programmed for intercity rail improvements, including grade separation projects.

Part 2 - 40% of the program may be programmed to transportation improvement projects to facilitate interregional movement of people and goods, including State highway, intercity passenger rail, mass transit guideway, or grade separation projects. These projects may be in either urbanized or non-urbanized areas.

Of this amount, up to 60% (24% of the interregional program) may be in the South counties, and up to 40% (16% of the interregional program) may be in the North counties.

Part 1 – Rural		
Non Urbanized IRRS:	\$243,772	
Intercity Rail:	<u>78,113</u>	16.6% (Range: 9 to 100%)
	\$321,885	68.6% (Range: 60 to 100%)
Part 2 – Urban		
North	\$ 37,171	7.9% (Range: 0 to 16%)
South	<u>110,346</u>	23.5% (Range: 0 to 24%)
	\$147,517	
Total New ITIP	\$469,402
